

How To Record Death On Farm

The NLMD-LT can record when animals are dead. Recorded animals deaths will be displayed in your holding register. You can record that an animals has died on your farm by selecting the “On Farm Death” option of the “Manage Animal” menu.

On farm deaths can be recorded against an individual animal or a batch number.

To record a death you must specify the holding the animal died on, the species of animal and optionally the breed.

The date of death must be recorded.

The Approved Disposal Route and Comments are optional.

If you have untagged animals, this can also be selected

 A screenshot of the 'Death Location & Date' form in the NLMD system. The form is divided into three sections: 'DEATH', 'ANIMALS', and 'COMPLETE'. The 'DEATH' section is active. The form contains the following fields:

- Death Location & Date:**
 - Death Holding CPH: 01/001/0001 (dropdown)
 - Species: Cattle (dropdown)
 - Death Date: 06/02/2017 (calendar icon)
- Disposal Details:**
 - Specify Disposal Holding CPH:
 - Approved Disposal Route:
- Carcase Details:**
 - Death Reason: -- Please Select (optional) -- (dropdown)
 - Comments:

 At the bottom left, there is a checkbox labeled 'Animal(s) died before tagging'. At the bottom right, there is a 'Next' button.

If you are recording the death of individually identified animals, you can enter the individual animal tag numbers in manually one per line or select from known animals by clicking on the “Select Animal” radio button.

If you are recording batch identified animals, you can enter the batch number and the number of animals and click the “Add” button.

Individual Identified Animals

Enter list of tag numbers Or Select tag numbers from grid of animals on farm
