

How to configure ARAMS

For English subscribers, NLMD-LT can send sheep movements to the Animal Recording and Movement Service (ARAMS) saving you from having to record data twice.

Register with ARAMS

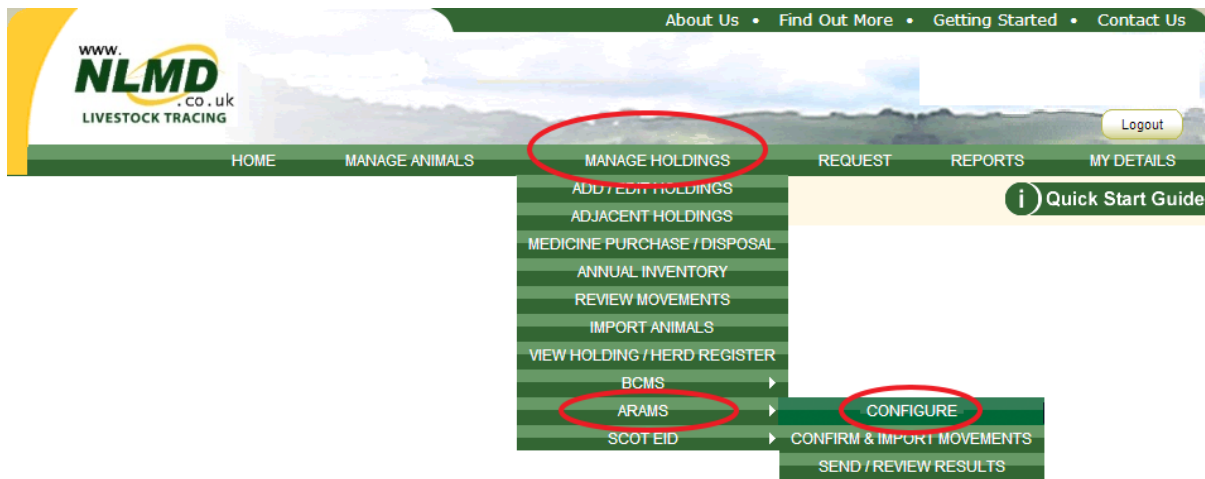

You must register an ARAMS account through their website www.arams.co.uk

You will be issued a username and password for sending records electronically.

Configure NLMD-LT

Before NLMD-LT can send data to ARAMS, you must add your holding details.

1. Go **to Manage Holdings > ARAMS > Configure**

2. Click the **Add New** button to add a holding.

3. Enter the user name and password from your ARAMS account, then select which services and options you require. Click **Next**.

What Should be Sent

Select the types of data you want to send to ARAMS using the login details above:

ARAMS Movement

ARAMS Confirm Movement

Notification Options

Send me an notification email if an error is reported

Cancel
Next

4. On the Holding screen, use the dropdown menu to select the CPH number that is associated with the ARAMS account, including any linked holdings. Repeat this step to add another primary holding. Click **Finished** to complete the configuration.

Configure ARAMS Settings

Select the holdings associated with the authentication details entered in the previous step.

If the holding has any linked holdings registered with ARAMS, select the CPH numbers of the linked holdings. When animals move between the primary and any linked holdings, the server will not notify ARAMS. Any births or deaths at

Configure ARAMS Settings

This page allows you to configure the sending of data to ARAMS. To configure data to be sent for a new holding click the 'Add New' button.

» View Getting Started Guide

Username	Destinations	Holdings	Status
test	ARAMS_MOVE ARAMS_CONFIRM_MOVE	12/123/1234	On

Add New

Edit Remove

Status must be set to ON.

Sending to ARAMS

Depending on the destination, the next time you record a movement a message will appear asking if you want to send data to ARAMS now, later or never. **Note:** Sheep movements to market or assembly and collection centres will **not** trigger an ARAMS request. Those holding types will manage the electronic reporting of on-movements for your animals.

Move Animals

Please click continue to submit another movement.

Request completed with some warnings

Your request ID is: 17412

Show warnings (5)

The request has data waiting to be sent to ARAMS. Do you want to send it now?

Review & Send Not Now Leave, Never Send

Download movement document
Download a printable copy of the movement document with the fields pre-populate with the movement details.

If you select “Not Now”, NLMD-LT will remind you next time you login to the website or you can trigger it to send by selecting from the main menu **Manage Holdings > ARAMS > Send / Review Results**. If “Leave, Never Send” is clicked NLMD-LT will not send it to ARAMS and will not remind you again.

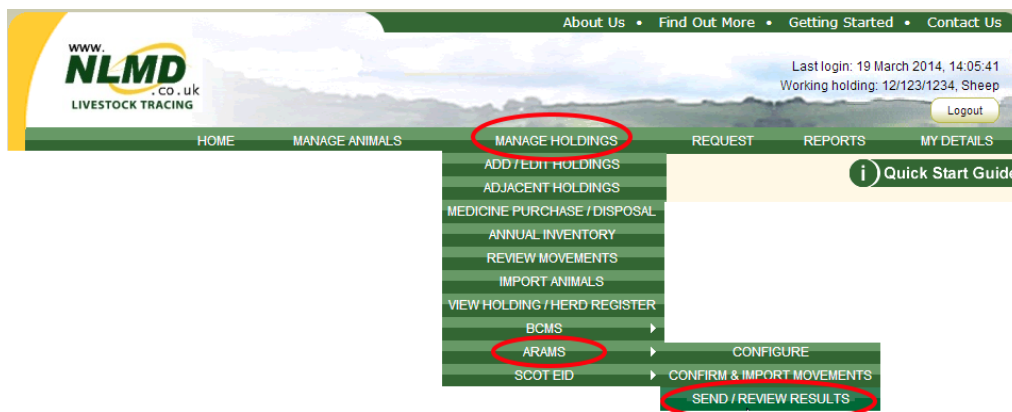

To send the event to ARAMS, click “Review & Send” and a page will appear previewing what is about to be sent. Click “Send Now” to begin the send.

If you don’t want to wait for the result or it is taking longer than 2 minutes for ARAMS to process it you can check the result later by selecting from the main menu **Manage Holdings > ARAMS > Send / Review Results**. NLMD-LT will warn you next time you login if there are any errors and you can also configure it to send you a notification email.

Reviewing results

You can review the status of any of your submissions to ARAMS. This will be necessary if you are contacted by ARAMS or need to resolve submission errors.

Go to **Manage Holdings > ARAMS > Send/view result**.

The **Pending** tab shows movements that are waiting to be sent to ARAMS. The **UnResolved** tab shows movements that were rejected by ARAMS and have errors waiting for resolution. The **History** tab shows all completed movements.

Send / Review Results - Animal Reporting and Movement Service for England

This page allows you to send recorded data to ARAMS. The Pending tab shows requests that have not been sent to ARAMS. Unresolved shows requests that have been sent but errors have been report by ARAMS, and History displays all previous requests that are complete. [View getting started guide](#)

Pending (0) **UnResolved (4)** History

UnResolved

Below are requests that failed or errors were reported when they were sent to ARAMS. Click the **Resolve** button to view the errors and correct them.

ARAMS Movement			
Request ID: 17283	Request Type: Movement / Transfer	Request Date: 19/03/2014	Resolve
Status: ✘ Completed with some errors	ARAMS Request ID: 140319021842669		
Document ID:			
Departure Holding CPH: 98/765/4321	Destination Holding CPH: 12/123/1234	Species: Sheep	Departure Date/Time: 19/03/2014 00:00
Loading Date/Time:	Departure Animal Total: 5	Arrival Date: 19/03/2014	Unloading Date/Time Last Animal Unloaded:
Number of Animals Received: 5			
Error Code	Error Field	Error Message	
1234555		Invalid animal total	
223		Invalid tag number	
224		Tag not allocated in ETAS	
225		Animal recorded as dead	

If an error is the result of your mistake (e.g. entering a wrong tag number), you can resolve the error by undoing the movement and starting again. Alternatively, you can choose to ignore the ARAMS error message but this means you will still have a record of movement in NLMD-LT and you must contact ARAMS to resolve the problem.

Resolve Options

ARAMS reported errors in part or all of the request, how do you want to resolve the errors?

- Undo the Movement for the selected animals - Use this option if you made a mistake such as entering an incorrect tag number, holding CPH or date. This will undo the Movement in your holding register records then you can record a new Movement for the animals that had errors to make the correction.
- Ignore - Use this option if you want to leave the Movement of the animals with errors in your holding register records. You will need to contact ARAMS to resolve the errors, any tag numbers with errors have been rejected by ARAMS so have not been successfully lodged with ARAMS.
