

## How to Record Weights

Animal weights can either be recorded by selecting individual animals from a grid or by importing a list of weights from a file.

After logging into NLMD-LT, under the **Manage Animals** menu, select **Weights**.

## **Recording by Selecting Animal from a Grid**

To add weights for individual animals:

1. First select the species, the date of weighing and the holding CPH where the animal was located when it was weighed.

This page allows you to record animal weights. If you have multiple weights in a file, use the <b>Import</b> <b>Weights page</b> . To record a new weight, select the holding, species and weigh date.	Species* Weigh date*	• & Species 01/001/0001 Sheep ▼ 05/08/2015		D					
Next select the animal weighed, its previous weights will be shown in	Weighed Animal

- 2. The animal grid will show all animals on the selected holding and weighing date. You can use the Find & Filter options to find the right animal. Click on the animal's row to select it.
- 3. Previous weights for the selected animal will be displayed in the **Weight History** tab.
- 4. Enter the new weight in kilograms and optionally the conditions score (a number between 1 and 10) and grade. Finally click the **Add Weight** button to save the weight.

## **Recording by Importing Multiple Weights from File**

To import multiple weights from file, select the **Import Weights** link on the left of the main Weigh Animals page.

This page allows you to record animal weights. If you have multiple weights in a file, use the Import Weights page. To record a new weight, select the holding, species and weigh date. Next select the animal weighed, its previous weights will be shown in	Weigh Anim Weigh Location Weighed at * Species* Weigh date* Weighed Anima	a & Species 01/001/0001 Sheep ▼ 05/08/2015				
the grid on the right. Now enter the weight and optionally the condition score and grade. Finally click 'Add Weight' to save it.						Find & Filter Tag Number
	TagNumber 🔶	Breed	Date of Birth	Gender	Comment	Enter tag last few digits
	UK0123456 00001	Exmoor Horn	01/03/2015	Ram		Breeds

1. First select the species and the holding CPH where the animals were located when they were weighed.

This page allows you to import multiple weights from a Comma Separated Value (CSV) file. Select a species and holding the weights were recorded at. Next select the CSV file and click 'Import'. » View Getting Started Guide » Download Template	Import Weights Weigh Location & Species Weighed at * 01/001/0001 Species* Sheep • 1					
	Upload File Select a Comma Separated Value (CSV) file containing the weights. The file should have the following columns, with each value separated by a comma:					
	Column       Description         1       Weight Date       Date the weight was recorded         2       Tag number       Visual tag number of animal (optional if EID is specified)         3       EID Number       EID number of animal (optional if tag number is specified)         4       Weight       Weight in kgs         5       Condition Score       Condition score between 1 - 10 (optional)         6       Grade       Grade (optional)         Upload CSV File * Choose File					
	Import 4					

2. Create a Comma Separated Value (CSV) file containing the weights. The file should have the following columns, with each value separated by a comma:

	Column	Description
1	Weight date	Date the weight was recorded <i>e.g. 01/08/2015</i>
2	Tag number	Visual tag number of animal (optional if EID is
		specified) e.g. UK0123456 00001
3	EID	EID number of animal (optional if tag number is
		specified) <i>e.g. 0826012345600001</i>
4	Weight	Weight in kgs <i>e.g. 50.12</i>
5	Condition Score	Condition score between 1 - 10 (optional) e.g. 3
6	Grade	Grade (optional) e.g. R3L

To get you started, we have provided a template for you to download (click on "Download Template").

Save the file as a CSV file (most spreadsheet applications, like Microsoft Excel, will allow you to save a spreadsheet in CSV format).

- 3. Click the **Browse** button to locate the CSV file saved on your computer.
- 4. Finally click the **Import** button to add the weights.
